

ABOUT VISTRA LONDON

Truly Global.
Truly Independent.
Truly Personal.

SERVICES

The Office

Within a stable political environment and one of the world's prime financial markets, the UK provides an ideal location for new and existing businesses. In addition, the current UK government has set as one of its main goals, a reduction in the burden of regulation on businesses. The World Bank ranks the UK highly in Europe and in the World as a location for running a business and the establishment of a UK company can be completed in a matter of days.

The key advantages of locating in the United Kingdom are well known: political stability, legal certainty, a solid regulatory regime and a large pool of professional talent. Perhaps less well known are the tax advantages that locating in the United Kingdom can offer to an individual or to an international business. For example individuals who are resident but non-domiciled in the UK can claim a special tax treatment and elect to only be taxed on a remittance basis. Appropriate structuring will also result in significant tax savings for international companies.

The London office is located in the heart of Mayfair, close to the offices of many major international banks and professional firms.

The Vistra Group currently has a presence in 20 jurisdictions worldwide, and the London office makes full use of the advantages that those jurisdictions have to offer when providing clients with solutions to their needs.

The Services

Our roots in London go back to 1982, and the foundation of the tax group Chiltern Plc, upon which Vistra London was established. Our current form is the result of the management buy-in of Chiltern's London private client business. Following the buy-in, the Vistra brand was launched in November 2006 and since then both the servicing team and the service offering have grown continuously.

The servicing team, which includes company secretarial, tax, accounting and fiduciary staff (many of whom are multi-lingual), provides the full range of company formation and management services, including the provision of registered office and directors, accountancy services, tax compliance and full company secretarial services in respect of UK companies.

We also have great experience in assisting our clients and their families with all manner of UK immigration issues, especially for non-EU nationals.

Our private, corporate and institutional clients greatly appreciate our capacity to offer tailored solutions on a one-stop service basis. Below is a list of services that we can provide:

Company Formation & Management

- Incorporations in most jurisdictions;
- Provision of shelf companies;
- Provision of directors;
- Registered office facilities and/or dedicated office space;
- Provision of nominee shareholders;
- Provision of bank signatories;
