

About Vistra Seychelles

Introduction

The Seychelles is a sought-after jurisdiction for offshore incorporations, with a stable, yet independent, political and economic climate. Many clients use the islands as an incorporation centre, but it also offers a very attractive platform for the management and control of Seychelles companies.

The Seychelles' time zone makes it convenient for European clients and its extensive double taxation agreements, not to mention cost effective professional services, which all complete the offering.

With full company management and trust licenses, our Seychelles team includes many qualified and readily accessible local directors who can provide full range of management and trust services in this well-regulated, offshore financial centre.

Our Services

As a global business with well-established roots in the Seychelles, we're in tune with the country's relevant legislative, political and economic changes, and provide the following range of services.

- **Directors:** We can provide full director and management services in the Seychelles for IBCs, CSLs and other foreign-registered companies.
- **Nominee Shareholders:** For clients seeking confidentiality, we provide corporate shareholders to hold shares under the terms of a declaration of trust in favour of the beneficial owner of the structure.
- **Trusts:** Trusts are created in the Seychelles under the Seychelles International Trusts Act 1994 providing benefits of interest for high net worth families.
- **Foundations:** The Seychelles has a modern Foundations Law based on the Liechtenstein model and appeals particularly to practitioners and their clients in civil law countries.
- **Trustees Services:** Where robust tax and succession planning is required, Vistra will provide trustees to own the shares of the company and arrange the drafting of the appropriate trust instrument.
- **Tax & Accounting Advice:** We can provide comprehensive, trusted, international tax advice and a full range of accounting services through our UK office.
- **International Business Companies:** We can form Seychelles International Business Companies (IBC's) quickly and cost-effectively for a variety of uses.
- **Special Licence Companies:** Also known as CSLs, after the governing legislation, can be registered via our office.
