

Act. Recover. Thrive.

How you can deal with today and prepare for tomorrow.

When the world is constantly changing, we understand you need to focus on your core family business and navigate through a turbulent economy.

As the saying goes ‘uncertainty is the only certainty’ – and that has never been truer than right now. The spread of COVID-19 and the unpredictability of the future presents significant challenges to businesses and markets around the globe. The impact is far reaching – from disrupting economies on a global scale, impacting supply chains and consumer behaviour, to emergency legislation and altered regulation - its effects will be felt for some time.

All families and their enterprises will be affected in different ways at different times. Vistra works with entrepreneurial families via a unique three phase approach to mitigate and address the economic, operational or regulatory impact which your businesses are facing now, and over the coming months: Act, Recover and Thrive.

Act | Manage business through disruption

When the world is changing on a daily basis, you need to focus on your family business and how to survive a tumultuous economy. We're here to support you through this and help you come through the storm.

Our compliance team and their extended network is made up of highly qualified accounting and tax professionals all over the world. We keep track of any statutory, regulatory, and legislative change and proactively advise on how to implement and stay compliant. Our specialised company secretarial team makes sure you have full control of your international operations, so wherever in the world you can be sure that you have everything you need in place.

In addition, our Private Wealth specialists are available to advise on how to protect family wealth during periods of significant volatility and build tailored solutions for each family's unique challenges and circumstances.

Recover | Strengthen and rebuild operations and finance

All corporate structures can get impractical and inefficient over time. Rationalising and simplifying structures and service providers will keep your family business in shape. Vistra can help you:

- Build efficient operating structures
- Improve operational transparency
- Reduce costs & governance burdens
- Align assets and resources ready for sale

And we don't just advise - we execute on that advice and underpin with leading technology platforms.

Thrive | Create competitive advantage for the upturn

Your family business is ready to thrive in the new world and seize competitive advantage.

Whether you need to establish a legal entity, divest, create or reform corporate structures, stand up a management accounting function, hire or transfer employees or just run payroll and fulfil local employer obligations, you need a professional and reliable partner.

Or perhaps it is time to grow and expand. We act as an extension of your in-house accounting team delivering management accounting and transactional payment support. Through a combination of our global experts and on-the-ground specialists, we can advise you on everything from expanding into new markets to keeping your business up to date with changing regulations in multiple jurisdictions.

Our Private Wealth specialists have extensive experience working with the next-generation of the family enterprise, providing governance and guidance to help them realise their ambitions and create additional family wealth within a safe environment. We also recognise the increasing appetite of family's for access to direct investment opportunities and look to facilitate this through Vistra's significant Private Equity and Real Estate Funds business and extensive intermediary network.

Wherever you want to do business, Vistra can help you get started quickly and successfully.

Building greater resilience during times of crisis

Through our global reach, we can offer support you across the world. Led by our team of experts, we create bespoke multi-country Private and Corporate solutions dictated by operational requirements. Whether the focus is on managing through the immediate disruption, strengthening and rebuilding operations or creating competitive advantage, Vistra can help you seize the opportunities, deal with today and prepare for tomorrow.
