

CASE STUDY

Private Equity Asset Manager grows operations in Europe

Vistra successfully sets up and administers 25+ funds and operational entities over a period of 4 years.

The challenge

With a growing business, the client needed more governance, and strong central admin expertise. Due to increased activity, the client had to set up several General Partners (GPs) and launched a series of funds.

The increase in the number of entities resulted in a need for a better monitoring of the regulatory and operational duties.

Vistra's solution

Vistra implemented a strong governance procedure. In-person board meetings were initiated and board packs were created to great client satisfaction. During these physical meetings, exchange of information was increased (with client updates on the legislation).

A structural change was implemented by Vistra, across all the departments to facilitate the flow of information and efficiency in coordination to the client's utmost satisfaction.

Due to ongoing open and transparent communication, this relationship has gone from strength to strength resulting in a stronger partnership with an increasing number of funds moving across to Vistra for administration.

Services Offered:

Central Admin, including: Directorship, Fund Accounting, Tax services and Company Secretarial Services.

This private equity firm focuses on investing in companies operating in the manufacturing, business and technology services, and various other sectors.

It seeks to make fund investments across the spectrum of the private equity market, including buyouts, venture capital, mezzanine, distressed securities, secondary, sustainable energy and other specialty funds.
