Loans may be reported in the bucket 100%+. This is the consequence of the reporting method of using original loan and market values for a loan with a further advance. The original loan amount plus further advance amount are divided by the original market value. The reality is that the further advance was underwritten on the basis that the market value of the property was increased (evidenced by a new valuation report at the time of underwriting). The LTMV was never above 100%.
